NATURAL PULP

EASY GREEN ECO PACKAGING CO., LTD.

OUR MISSION

According to relevant researches, people around the world are changing their way to eat, such as eating more various of food, in more places, and in more ways than before. And all we mentioned above is actually bringing us a great numbers of challenges and chances.

Under this circumstances, Easy Green, named after the goal that we go green in an easy way, was created in 2009 as an eco-friendly packaging company and quickly earned reputation in international market. We aim to offer proper package for 252(love what I love) kinds of different foods. Not only do we want to make food look great, but also we want to keep it safe and sustainable too.

Today, we continue to uphold the same mission to be of service to customers and consumers in all that we do. We carry this in our business operations to address sustainability in our products and practices.

JUST FOR GOOD FOOD

INTRO- DUCTION

Social Responsibility&Sustainability:

The eco-friendly and environmental protection concept of Easy Green has promoted the virtuous development cycle of enterprises and society.

We believed lots of social and environmental issues are interacting closely. As the ecological systems are being irreparably destroyed due to human activities, we are currently facing to many challenges from environmental pollution and climate change.

Meanwhile,the inequalities among people throughout the world are increasing comparing with before.Agreat number of people are suffering poverty around the world and they are lacking in food, water, sanitation,education, healthcare and more.Environmental pollution and climate change definitely aggravate the poverty situation,especially for the areas with limited resources.

At Easy Green we encourage our employees and customers to give back to the communities in which we live and work in the following ways :

101

Reducing waste

We will regularly organize volunteer activities, such as

- Pick up rubbish on the road
- Introduce degradable material to local people

Alleviating Poverty

● In the past two decades, we have been donating to build schools in poorer regions for the belief of education is an essential measurement to alleviate poverty.

- Raise joint donation to poor area with ourclients.

021

103

Talking the social responsibility

- Donate to anti-covid solution.
- Provide prevention supplies to epidemicarea
- Give timely and continuously support for prevention supplies to our customers in Australia USA, Canada, UK

OUR HISTORY

In 2003: Our group fully made use of the synergy advantages from local relevant industries to build the first thermoforming plant in Foshan, Guangdong, a city famous for manufacturing. With reasonable price, good quality and updated design, our main product- disposable tableware, quickly won the reputation from domestic & international market and customer's satisfaction & trust .

In 2009:With accumulative of clients, aggregation of production experience and increased demands of disposable tableware, we realized the importance of having a own-brand. To make the dream of "offering healthy and disposable packaging solutions to 252 kinds of food" come true & encourage people to go green in an easy way, CEO Angeli established the brand "Easy green".Soon afterwards, a sales service center had been set up in Foshan, where next to Guangzhou port and Shenzhen port, to offer customers better and timely service. In the same year, our group invested heavily in setting up a second thermoforming factory in Taiwan with high-level facilities, exquisite workmanship and full process production lines.

In 2012:In order to meet the rapidly increased needs of product packaging, we invested in a carton packaging factory during 2012. Stable production capacity and high-quality service are the bottom line that we have always adhered to.

In 2014:Since market share increasing, our group set up the first injection molding factory in Taichung and the product category has been greatly expanded.

In 2015: As the life pace is getting faster, a more convenient life would be expected. We believe the market demand for disposable tableware will keep going up. Thus, the group established a third thermoforming factory in Kunshan, Zhejiang (adjacent to Shanghai port).

In 2016: Time goes by, we realized the urgency of environmental protection. Bagasse, a waste product from sugarcane that can be 100% biodegraded, came into our vision. Therefore, the first plant for bagasse tableware, which is also a meaningful milestone for our group, has been founded in Taiwan.

In 2018: Our strategic investment of bagasse production turned out to be correct & successful. To improve production capacity, the second bagasse plant has been founded in Foshan, Guangdong.

In 2020: During 2020, the 1st paper production plant started running in Zhejiang, which greatly enhance our products categories. Besides, by adopting imported food-grade kraft paper as raw material, paper products got advantages as: light, environment-friendly and degradable.

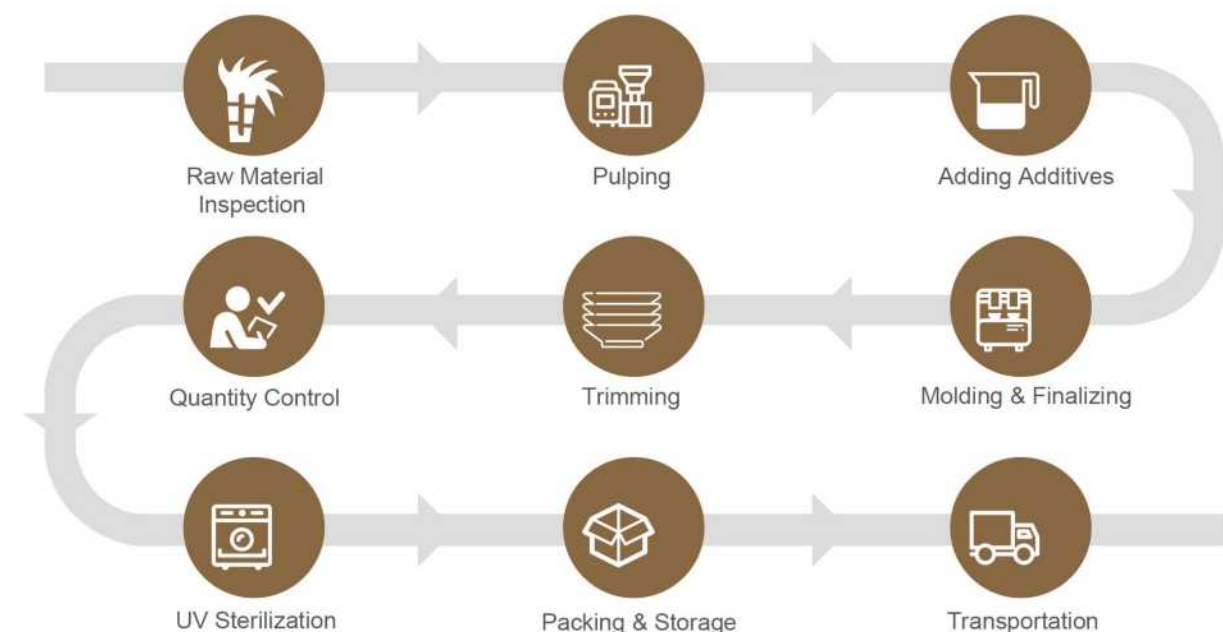

MATERIALS INTRODUCTION

PULP PROCESS INTRODUCTION

PULP

NATURAL PULP PRODUCTS ARE MADE FROM FROM RENEWABLE PLANT FIBER SUCH AS SUGARCANE BAGASSE, BAMBOO PULP, REED, WHEAT STRAW, WITH GOOD OIL PROOF AND WATER PROOF.

EG Sushi Tray

EG sushi tray with clear anti-fog lid is suitable for serving Japanese food such as sushi and sushi platters, also for cakes or cookies, allows customers to see the food from outside the box.

EG Square Bowl

EG square bowl with different volume is suitable for serving salads, fruits, light meals, fast food, etc.

CR Round Bowl

CR round bowl is suitable for serving salad, ramen, noodle soup, pasta, etc.

CB Square Bowl

CB square bowl suitable for serving salads, ramen, noodle soup, spaghetti, etc.

CR Rectangle Box

CR rectangle box is suitable for serving large volumes of cooked food, fast food, fruit, and bento.

CS Square Box

CS square box is suitable for serving large-capacity cooked food, fast food, etc., which has 2-3 compartment to separate different types of food.

CJ Compartment Tray

CJ compartment tray is suitable for different types of light food, pasta, sauces, nuts, etc.

ER Rectangle Container

ER rectangle container is suitable for serving salads, pasta, fruit, baked goods, etc. The oval rectangle design is easier for take-out.

...

EG Sushi Tray

IT IS SUITABLE FOR SERVING JAPANESE FOOD SUCH AS SUSHI AND SUSHI PLATTERS.
